Professional Summary

Software engineer with 5 years of experience developing scalable backend systems and machine learning applications. Experienced in Python, C++, cloud computing, REST APIs, and data-driven software development. Passionate about building reliable software and deploying production machine learning systems.

Education

Master of Science, Computer Science

University of Washington

2024

Bachelor of Science, Computer Engineering

University of California, Davis

2019

Skills

Python

C++

Java

SQL

Git

Linux

Docker

FastAPI

PyTorch

scikit-learn

Pandas

NumPy

AWS

REST APIs

System Design

Experience

Machine Learning Engineer

BluePeak AI

2023 – Present

- Developed production ML APIs using FastAPI and PyTorch.
- Built feature engineering pipelines for customer analytics.
- Reduced model inference latency by 35%.
- Deployed applications on AWS.
- Collaborated with data scientists and backend engineers.

Software Engineer

TechNova

2019 – 2023

- Built distributed backend services in Python.
- Designed REST APIs used by over 200,000 users.
- Improved database performance by 40%.
- Automated testing using GitHub Actions.
- Mentored junior developers.

Projects

Document Question Answering System

- Built a Retrieval-Augmented Generation application using FAISS and Sentence Transformers.
- Implemented semantic search across technical documentation.
- Developed a FastAPI backend.

Image Classification Benchmark

- Compared CNNs and Vision Transformers on CIFAR-100.
- Evaluated accuracy, latency, and GPU utilization.
- Visualized results using Python and Matplotlib.
